Benchmarking

Lidia Majchrzyk

2015-12-15

Description

Benchmark for mode() function// Implemantation of similar function to the qgramdist (stringdist from stringdist package) runs only on strings, so comparaison is not posssible as qgramdist works on vectors of integers.

[1] "x:" "100000" "y:" "100" "z:" "1000" "w:" "10000"

	test	replications	elapsed	relative	user.self	sys.self	user.child	sys.child
